

# Event Notification Service Update

Health Information Exchange  
Coordinating Committee

*Friday, November 20<sup>th</sup> 2015*

# About ENS

- ENS provides notification of patient hospital encounters (emergency or inpatient) to subscribing organizations (health plans and accountable care organizations)
- ENS alerts enable health plans and ACOs to improve coordination of care, reduce hospital readmissions, and direct non-urgent care to the primary care setting.

# Hospital Participation

- Over 200 hospitals provide data through ENS, making it one of the largest encounter notification services in the nation.
- LIP payments encouraged hospital participation during 14/15 and 15/16.
- There are no fees for hospitals to act as data sources for the service.

# Subscriber Participation

- Health plans and Accountable Care Organizations (ACOs) can subscribe to receive data through ENS.
- Subscribers provide a roster or panel of current members/patients to the Florida HIE.
- Hospital data is matched to subscriber panels to provide encounter alerts to subscribing organizations.

# Subscribing Organizations

- Participating health plans

- WellCare of Florida
- Sunshine State Health Plan
- South Florida Community Care Network
- Molina Healthcare
- Integral Quality Care (ended 11/1/15)

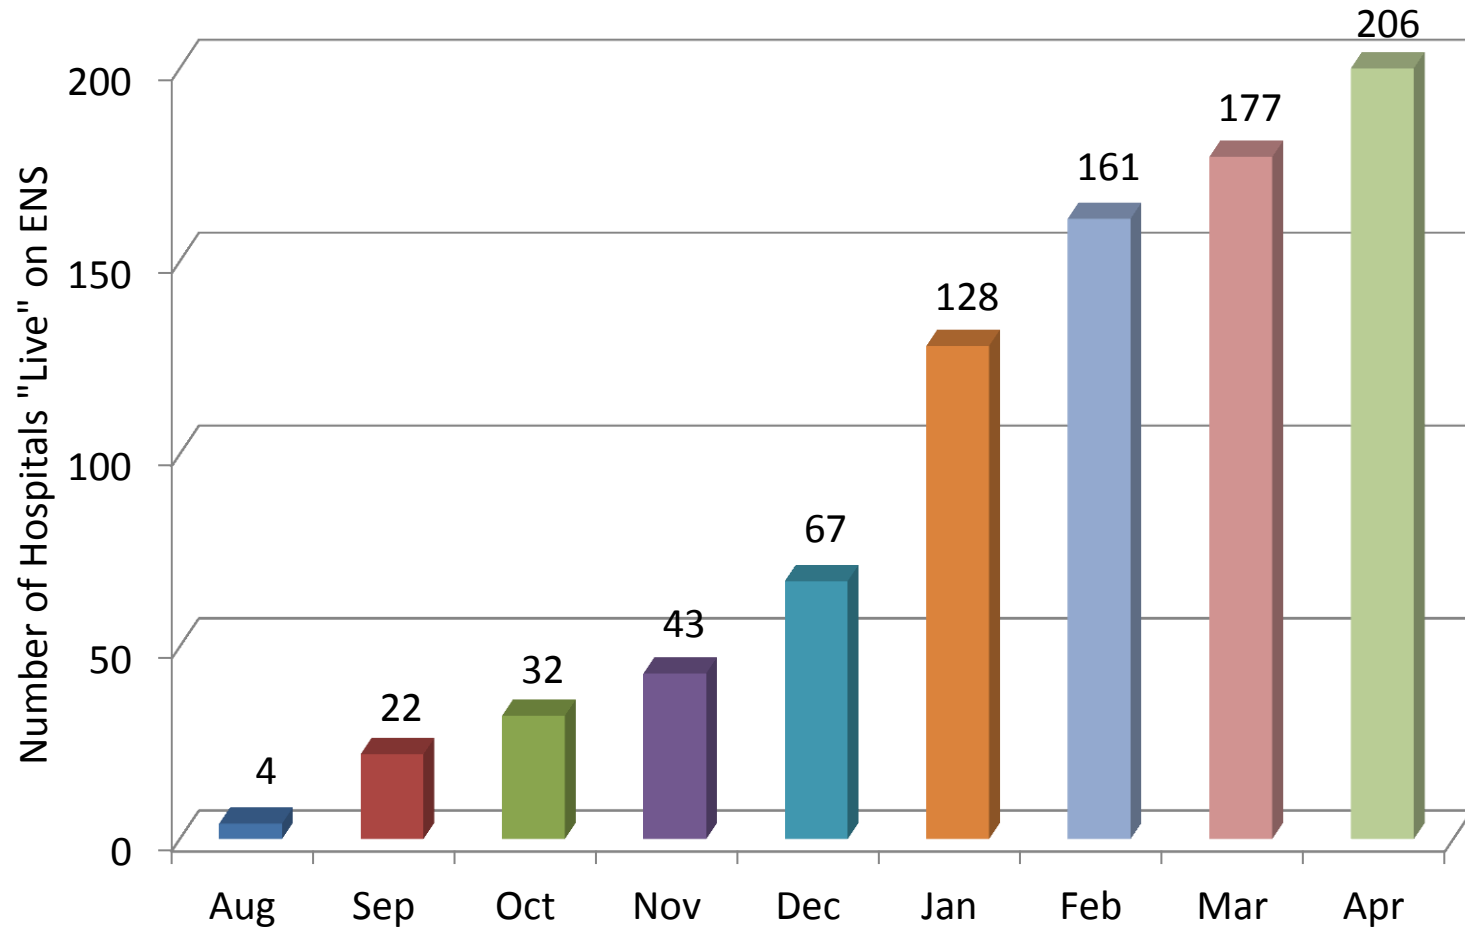

- Participating Accountable Care Organizations (ACOs)

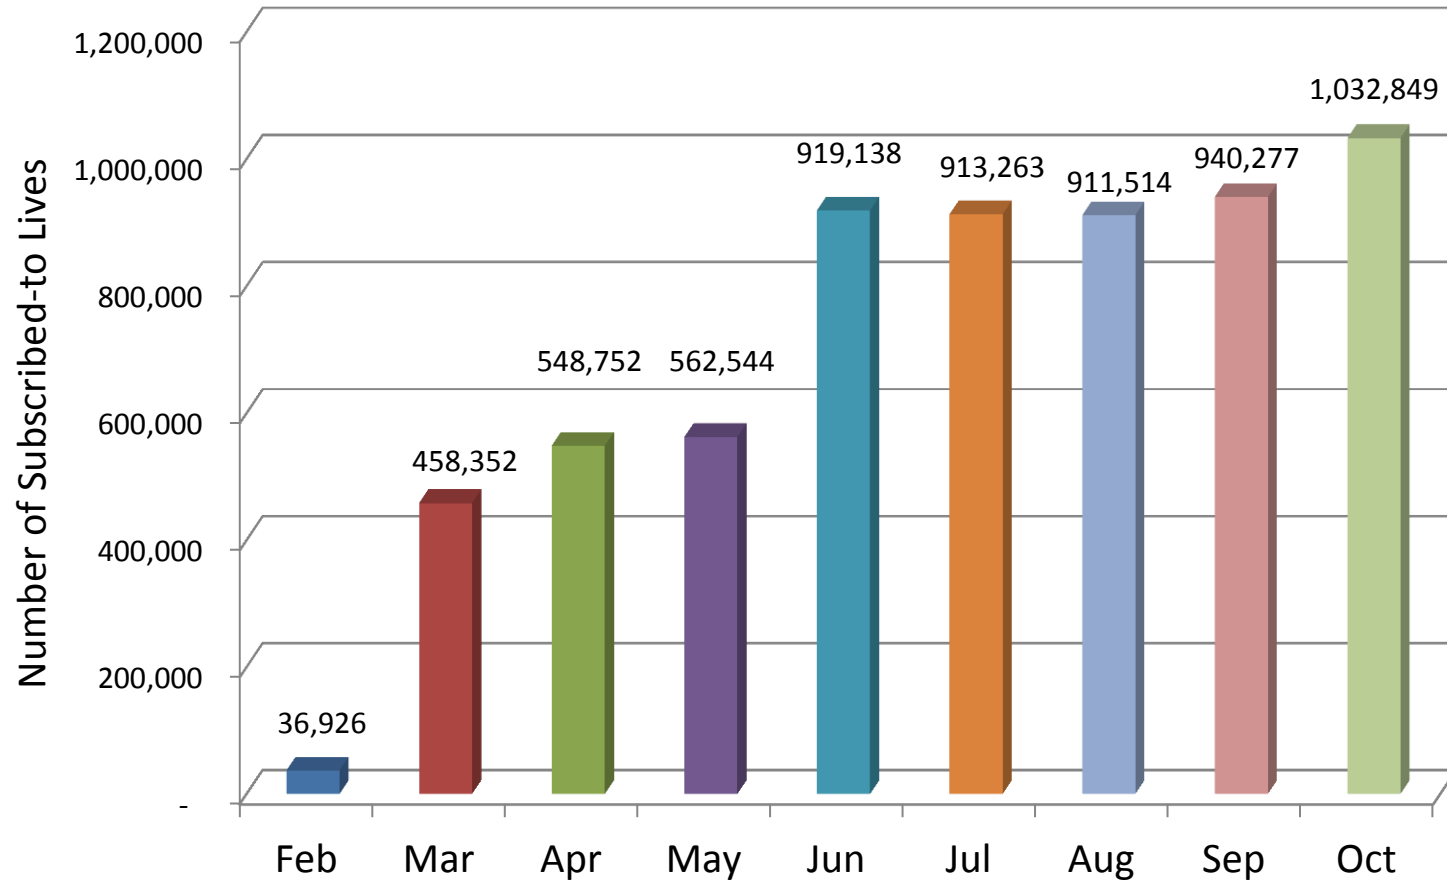

- ACCNWFL
- Accountable Care Medical Group
- Accountable Care Options
- Aledade
- All Care Options
- Health Choice Care
- Orange Accountable Care of South Florida
- Palm Beach ACO
- Primary Partners ACO
- United States Medical Management ACO

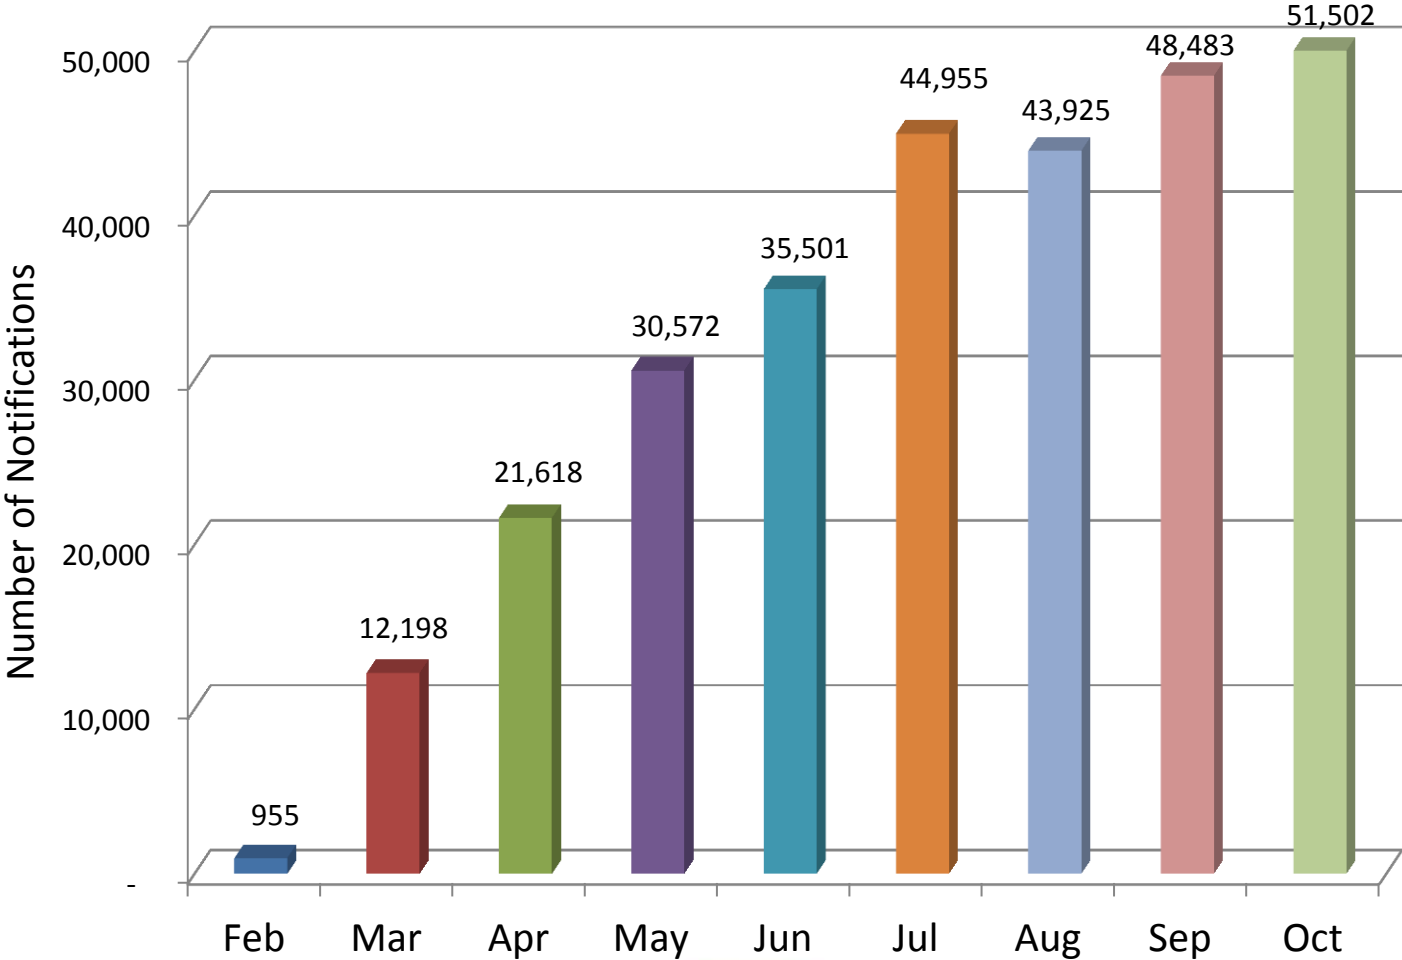

# ENS Hospitals

# ENS Panel Size

# ENS Alerts

# Hospital Auto-Subscription

- At a hospital's direction, we can compile that hospital's encounter data into a rolling 30-day panel.
- This hospital panel can then be used to alert the hospital whenever a patient is seen at another ENS hospital with 30 days of their initial discharge.
- Would allow hospitals to easily track readmissions outside of their own hospital system.
- Possible launch during the first quarter of 2016.
- Would provide additional revenue for the Florida HIE.
